

SCRUM Master: Henry Robinson

- How long did it take me to complete my tasks?

It took me a good bit of time to get my tasks done because of other work that I needed to complete.

- How accurate were my time estimates?

My Team members had similar problems with their work because three of our four members are in CIS 484, and we had an important project and test the same week as the first sprint. This divided the attention of the group and made it more difficult to schedule meeting times.

- How often did I encounter any impediments (blockers or issues)?

The largest impediment was other conflicts with school. I did my best to address this in our group by trying to do extra work where necessary and convey information with my group.

- What went well?

Our group was able to communicate about the information effectively.

- How could I do this job better?

I could have done better by trying to get everyone to work ahead of time so that other conflicts did not arise. I need to be more proactive in the future.

- What things to I want the next ScrumMaster to continue?

Communication and cohesion amongst the group.

- What things to I want the next ScrumMaster to change?

Schedule meetings earlier and stress the importance of getting work done ahead of time.
